VLC arquitectura is an international research journal, covering architecture with an interdisciplinary approach. It is meant to be a forum for discussion on the architectural and urban project, ranging from its technical, energetic and material dimensions, to its theoretical, historical and graphics perspective. Education research on architecture is also welcome.

All researchers related to architecture and urban planning are invited to contribute. Published twice a year, the journal appears in hard copy and digital version. The selection of papers is done through a referees’ system, following the usual protocols for scientific publications. VLC arquitectura is included in Scopus, Thomson Reuters Web of Science (Emerging Sources Citation Index), and in the Avery Index to Architectural Periodicals (Avery Library, Columbia University, NY). The journal is also covered by the following databases: European Reference Index for the Humanities and Social Sciences, Ulrichsweb, Serpha/Romeo, DOAJ, Dialnet, Latindex, ISOC, MIAR, Dulcinea, REDIB and Google Scholar.
