LECTURE

Date: May 15th, 2025

Title: Window Wall

Description: Through a panoramic review of Pezo von
Ellrichshausen's body of work, the lecture will introduce a theoretical
background about the intersection between painting and building.
Following the title of a recent book, the presentation will reflect about
the figure-ground visual paradox in its extension to a fundamental
architectonic problem, this is; that of the reciprocity between literal
and nominal opacity.
